PROFESSIONAL SUMMARY

Process Automation & AI Solutions Specialist with 3+ years across project management, operations and accounting. At Rowwad, ran production of 40+ multilingual videos and cut delivery from two weeks to about four days; at Mozzn Factory, organized the workflow and wrote operating and safety procedures; as an accountant, managed accounts exceeding SAR 1M. Same approach every time: study the problem and draft an action plan, then build the right system for the task, start executing and update the plan whenever needed.

CORE COMPETENCIES

Process Analysis & Redesign (As-Is / To-Be) | Project Management & Team Coordination | Quality Control | KPIs & Dashboards | Process Documentation (SOPs) | Accounting & Financial Operations

WORK EXPERIENCE

Technical Project Coordinator – AI & Automation (Co-op) | Rowwad Translation Center Apr – Aug 2026

- Ran production of 40+ religious educational videos in multiple languages through approval and publishing, supervising 5 editors and 5 language supervisors who each lead native-speaker linguists.
- Mapped the existing workflow, where overlapping stages caused repeated re-recording, and redesigned it as a stage-gate process (no stage starts until the previous one is approved), cutting delivery from two weeks to ~4 days.
- Introduced a point-by-point final QA check against source videos, reducing post-delivery issues by ~97%.
- Resolved bottlenecks by re-prioritizing work and rebalancing tasks across editors based on capacity.
- Built a real-time React dashboard linked to the dubbing system API, giving management visibility of every clip.
- Built an Arabic AI voice-over agent: two weeks of training and review, then 200+ audio clips in a single day.

Operations Assistant | Mozzn Factory Jun 2025 – Jan 2026

- Organized the daily workflow and wrote machine operating steps and safety procedures.
- Built coffee roasting batch schedules and trained the sorting machine to reject defective and burnt beans.

Data Collector – Lead Generation | Mozzn Factory Apr – May 2025

- Collected 7,000+ lead records (cafés, roasteries, markets) across 8 cities, segmented into 3,000 qualified prospects.

Accountant | Beautiful Smile Dental Company Feb 2021 – Dec 2022

- Managed accounts exceeding SAR 1M, recording daily invoices and expenses and preparing AR reports.
- Processed payroll, posted daily journal entries and performed weekly bank reconciliations to ensure accuracy.

Online Store Operator | Mozzn Factory Aug – Oct 2020

- Helped launch the online store, then ran it end to end: orders, deliveries and customer support.

SELECTED PROJECTS

- **Content Production Management System (Google Sheets):** tracks the production cycle through 5 statuses from script upload to approval, auto-balances workload with a 3-project cap per editor, and includes a live completion dashboard and editor stats. [View demo](#)
- **Mozn Accounting & Management System:** a 13-module system for a beverage startup, bringing sales, purchasing, inventory and staff into one dashboard with net profit, receivables and low-stock alerts. [Open system](#)
- **Dhimma (own product, pre-launch):** a SaaS platform for following up on credit-sale collections, with 30 launch-ready features including per-debtor credit rating, debt aging, automated reminders and accounting reconciliation.

TECHNICAL SKILLS

Automation & AI: workflow automation and system integration via APIs, building AI agents, prompt engineering

Data & Systems: real-time dashboards, internal systems, data cleaning & segmentation, advanced Excel & Sheets

Languages: Arabic (native), English (advanced)
